

# 11

## **Managing Objects with Data Dictionary Views**

# Objectives

**After completing this lesson, you should be able to do the following:**

- **Use the data dictionary views to research data on your objects**
- **Query various data dictionary views**

# The Data Dictionary

# Data Dictionary Structure

# Data Dictionary Structure

## View naming convention:

View Prefix	Purpose
USER	User's view (what is in your schema; what you own)
ALL	Expanded user's view (what you can access)
DBA	Database administrator's view (what is in everyone's schemas)
V\$	Performance-related data

# How to Use the Dictionary Views

**Start with DICTONARY. It contains the names and descriptions of the dictionary tables and views.**

```
DESCRIBE DICTIONARY
```

Name	Null?	Type
TABLE_NAME		VARCHAR2(30)
COMMENTS		VARCHAR2(4000)

```
SELECT *  
FROM   dictionary  
WHERE  table_name = 'USER_OBJECTS';
```

TABLE_NAME	COMMENTS
USER_OBJECTS	Objects owned by the user

# USER\_OBJECTS View

- **Describes all objects that are owned by you**
- **Is a useful way to obtain a listing of all object names and types in your schema, plus the following information:**
  - **Date created**
  - **Date of last modification**
  - **Status (valid or invalid)**
- **Queries ALL\_OBJECTS to see all objects to which you have access**

# USER\_OBJECTS View

```
SELECT object_name, object_type, created, status
FROM   user_objects
ORDER BY object_type;
```

OBJECT_NAME	OBJECT_TYPE	CREATED	STATUS
REG_ID_PK	INDEX	10-DEC-03	VALID
...			
DEPARTMENTS_SEQ	SEQUENCE	10-DEC-03	VALID

# Adding Comments to a Table

- You can add comments to a table or column by using the **COMMENT** statement:

```
COMMENT ON TABLE employees  
IS 'Employee Information';  
Comment created.
```

- Comments can be viewed through the data dictionary views:
  - ALL\_COL\_COMMENTS
  - USER\_COL\_COMMENTS
  - ALL\_TAB\_COMMENTS
  - USER\_TAB\_COMMENTS
